

CUISSPOT

— A FOOD EXPEDITION MISSION —

THE CREW

DR RAHUL KUMAR VERMA (SUPERVISOR)

- 1) Samarth Sharma (LCI2021010)
- 2) Varad Jadhav (LCI2021012)
- 3) Yuvraj Byale (LCI2021031)
- 4) Ashwani Dhiman (LCI2021046)

INTRODUCTION

We are group of students from Indian Institute of Information Technology Lucknow, who are nothing but big foodies and who like to try out new and different food from different locations while fascinating over latest technologies changing our lives

MOTIVATION

We founded this project after a food crisis where we were unable to find the most famous sweets of Lucknow even after having someone from Lucknow in our team. That is when we decided to work on this issue and thus Cuisspot was born

NOVELTY

We are one of the first groups to make a TripAdvisor but in terms of ethnic food and provide their recipies, whether it is the Lucknow Kebab or the delicious Gulabi Chai everything would be found here

TECHNOLOGY USED

We have used the following tools to create our website:

- 1) HTML 5
- 2) CSS 3
- 3) NodeJS
- 4) ExpressJS
- 5) MongoDB (ATLAS + COMPASS)

THE COOKING

So what our website does is when you open our Discover Page and type your desired city (lets say Lucknow) the page fetches the information from the Cuizpot API and displays various results involved in the making

FLEXIBILITY

Seeing technology getting more and more portable we have made our website responsive i.e. you can open our website irrespective of the device

OUR FUTURE

Due to the lack of time we ARE currently involving our roots i.e. Lucknow in our existing API which only shows few dishes of Lucknow as well as a limited but most popular recipies for various categories. However we plan to launch our project taking small steps at a time

THANK YOU

THANK YOU FOR YOUR INTERESTS
